## Data sheet

**KELTRON**

### **RF750F** **Subscriber Unit Transceiver**

LISTED

**High Performance**  
**Cost effective**  
**Scalable**  
**Operational Control**  
**System Integrity**

**K**eltron's RF750 subscriber unit transceivers provide wireless, two-way alarm transmission from subscriber locations to the central receiver. Replacing expensive and unreliable telephone lines, active network radio is a self-routing and self-healing solution that ensures instant life safety event monitoring over a wide geographic area.

Designed for use in campus facilities, industrial complexes or municipal environments, Each RF750 transceiver serves as both a transceiver and a repeater that improves the strength and range of the entire network. The two-way unit provides high integrity communications to ensure that the signal continues until answered.

Keltron's RF750 subscriber units are available in two models - the F Series and the L Series. The RF750F is an 8-zone transceiver that is able to receive multiple types of inputs. The RF750L is a 16-zone transceiver that receives direct input from 16 zones.

#### **RF750 benefits**

**Speed** - messages are delivered in less than two seconds - faster than any other method

**Cost effective** - excellent value unit, case-mount antenna and easy installation reduces expense

**Scalable** - multiple routing enables wide range web-like network with high capacity growth potential

**High integrity** - unique store-and-forward technology eliminates signal loss

**Control** - owner operation retains control of up time for the facilities manager

#### **RF750F features**

- 4 reversing voltage inputs, optically isolated for maximum ability, programmable for reversing relay type fire panel outputs
- 4 programmable zone inputs for general alarm applications, also optically isolated for maximum protection
- Built-in power supply and battery charger
- Digital dialer input using the IntelliTAP receiver to tap the alarm panel dialer output and transfer full alarm data by radio
- Alternate input module, 8 programmable EOL fire/security inputs
- Alternate input module, DataTap™ RS232 interface to addressable FACP

Keltron develops and manufactures secure, reliable, UL-listed fire and security alarm response management systems and components for the municipal and proprietary life safety markets. Products include radio fire alarm, coded fire alarm and high-line security systems, digital alarm receivers, universally compatible fire alarm control panel networking solutions and a full line of alarm annunciators. ## SPECIFICATIONS

8 Zones	4 programmable zones, NO/NC/ supervised (fire) <b>plus-</b> 4 reversing voltage inputs (fire)  <b>or-</b> 8 programmable EOL fire/burglary inputs	Back-up battery	12V, 7AH (24h)/14AH 60hr), lead acid gel type
Ack delay/ Antenna cut	Open collector output (local reporting)	Low battery reporting	22.5 minute test cycle (approx.)
Radio	Standard frequency range is 450-470 MHz, others available	AC status reporting	Reports to central station after approximately 4 minutes without AC power, reports AC power restoral after approximately 4 minutes of restored power.
Standard output power	2 watts, others available. All radio systems require FCC licensing	Colors	Available in standard colors: burglary beige or fire red. Please specify when ordering.
Power input	16.5VAC, 30VA, UL-listed class II transformer required	Operating temperature range	0 to 50° C
Handheld programmer	1 per network - used primarily during installation of the subscriber unit to set subscriber unit parameters. PN 10R7041	Storage temperature range	-10 to 60° C
Voltage	12VDC nominal	Relative humidity range	0 to 85% RHC, Non-condensing
Current	175 mA standby, 800 mA transmit (2 W transmitter)		

## OPTIONS

IntelliTap	Satellite/remote dialer data receiver
DataTap	FACP data receiver
RF750F8	8 programmable EOL fire/burglary inputs
