

TYCO*Fire &
Security***Municipal Services Data Sheet**☒ **New Connection** ☐ **Update Position Number**

In order to establish a connection the following steps must be completed ...

-Signed Agreements

-Direct Connect Circuit Ordered and Installed

-Fully completed data sheet

-Payment in full for the Connection Charge

HOW TO SCHEDULE A CONNECTION: Connections will not be scheduled unless all above information has been completed. Once completed you will need to call 630-218-7550 between the hours of 9:00am to 4:00pm Monday through Friday to set an appointment for Alarm connection. ADT requires a 4-business day lead-time on appointments. If a more immediate connection is required, and ADT can accommodate the schedule there will be an additional rush charge. If ADT is not your alarm company but you would like us to provide the equipment necessary for the connection there will be an additional charge. Please make ADT aware of this immediately. You must arrange to have your Alarm Company or electrician on the job site at the time of connection. Your Alarm Company or electrician will call the respective Police or Fire station and ask to speak to the ADT Representative. After making phone contact, your representative will trip your system at the job site and send our representative a signal at the station so that we can verify the connection is complete.

It will be the Customer's responsibility to insure that a properly operating circuit or other suitable connection conductors are available when ADT is scheduled to make the connection. Your connection fee covers a one-time trip charge and the first hour at the Municipality; if the alarm circuit is not installed when ADT arrives for connection there will be an additional charge for each subsequent visit and each additional hour.
