

ADT Commercial Security is now Tyco Integrated Security

Dear Fire Alarm Subscriber,

Tyco Integrated Security, formerly ADT Commercial, has installed the computer hardware capable of receiving wireless fire alarm transmissions from "transceivers" located throughout the Village of Arlington Heights. Please take a moment to review the overall benefits of wireless radio transmission.

How does wireless alarm monitoring affect you?

- Eliminates the need for dedicated telephone lines (circuits) and costly repairs.
- Reduces the number of false alarms from phone line ground faults and unreliable technology.
- Ensures a higher degree of reliability during storm conditions than that of telephone lines.
- Over 14 years of proven reliability.

What will this cost?

The upfront costs are being waived for a limited time. \$81.00 per month includes the monthly monitoring fee, on-site service and the wireless transceiver.

How does this compare to my existing monitoring costs?

It is estimated that most fire alarm subscribers pay approximately \$39 per month for monthly telephone monitoring fees and another approximately \$140-\$250 per month for the leased dedicated phone line (circuit) used to monitor the fire alarm. Most people find that by converting, their overall costs for fire alarm connections decreases significantly.

Scenario #1: Fiber Optic Telephone Connection

Current Telephone Connected Alarm Charges

\$ 39.00 – Monthly Monitoring Fee (Approximate)
\$190.21 – Monthly Telephone Circuit (Approximate)

\$229.21 – Monthly Fee

Radio Rental

\$81.00 – Monthly Fee
Annual Savings: \$1,778.52

Scenario #2: Copper Telephone Connection

Current Telephone Connected Alarm Charges

\$ 39.00 – Monthly Monitoring Fee (Approximate)
\$160.10 – Monthly Telephone Circuit (Approximate)

\$199.10 – Monthly fee

Radio Rental

\$81.00 – Monthly Fee
Annual Savings: \$1,417.20

We encourage you to evaluate your current charges by contacting your telephone service provider to identify the costs of your dedicated copper/fiber optic telephone connection.

If you have any questions or would like to initiate service, please contact **Mike Marsh (773) 905-3857 / mikemarsh@tyco.com**.
