History: This message has been replied to.

There are 9 cats including kittens. The board has to keep in mind that even if she stops feeding that is not going to stop the problem. Those 9 cats and kittens don't disappear into thin air. They are still around, having kittens under someone else's bush on the property. We would like to trap them and get them spayed so they are not reproducing, but she wasn't interested in that. We need to be allowed to control the population humanely, otherwise you will be constantly chasing down people for feeding. Most people who see cats outside are inclined to put food out for them. It's human nature.

Hello,

Thank you for the update. No, I was not aware of this colony. I will see if I can identify the owner responsible, however, the Board will take strong action against the owner for feeding in the common areas. I appreciate the information. I have not yet had a determination from the Board on the use of the property for the colony for Ms. Whiteside as this matter will be considered at the Board meeting on Thursday. I will advise you of the Board's determination following the meeting.

Sincerely,

Hi Lisette,

I thought I would update you on our progress. We have trapped 4 so far. One was not returned to the property.

We have another feeder on the property whom is feeding at their patio. Deborah tried to talk to them to get them TNR and they seemed uninterested and didn't care if they reproduced. There are kittens at this separate colony.

Are you aware of these people?

Good Afternoon,

Thank you for the letter. I understand you have put traps out on our property for the cats. I thought since the colony is in Mt. Prospect, that the traps would go on their lands. I will forward your letter to the Board at the next meeting on June 27, 2013. If

they need any additional information or requests, I will let you know. Also, there is currently a cat in the trap that was reported to the office.

Sincerely,

---
