History: This message has been forwarded.

My payment went out on Monday.

I am well aware of the accusations that I am a "HOARDER" and have magazines and clothes all over as well as the "SMELL". I am not a hoarder of any sort nor are there smells. Yes there are times when MAGAZINES and Clothes are strewn about. That is a benefit of being single. There is not rotten food, dead animals, garbage or animal waste here. I clean and disinfect. I have a Bachelors degree in Health Science and am a Certified Medical assistant as well as a licensed Certified Xray,Mri and Bone density technician. I am very educated in parasites,bacteria and disinfection. I am very insulted how this is all taking place. I do not deserve this. Nor do I appreciate Rochelle and her constant harassment. I am doing research and am ready to take legal action if need be. I have no idea how I became such a target.IT NEEDS TO STOP.

Also the picture I sent you of the violations last week on the second floor B wing are still taking place. They also had a dog up there.

Also 118c of 1415 has a bike on the patio for three days. This is a violation. If the board wants to address violations they need to check everyone's patio. Bikes are not allowed to be on the patio any length of time. The fact that other violations that are reported are not addressed further enforces my case. Do you know that there is a lady in one of the other buildings who has two ferral cats she has been caring for on her patio all winter? But the board does nothing because they are obsessed with me.

Thank You
dw
