Lisette,

Why would the board want to spend all that money? To hire a private servicer will cost the residents at Dana point \$100-150 per animal. To tnr with us costs you nothing.

Also, the cats Debbie has done with us are microchipped to feral feline project and eartipped as required by law. Debbie will be a register caretaker with the county. Any wildlife company that traps our ear tipped cats and removes them I will report to the county and to the IL professional regulation board who hold their trapping license. Fyi-Many wildlife places don't like to remove cats because of the liability of getting someones pet cat or trapping a cat that is microchipped. They have no way to scan for a chip.

Tnr'd cats are not to be removed. If she has to feed them from the mt prospect side that is fine.

Tnr is accepted by many large, national groups and I am asking the board to take that in consideration and do research on it before making a decision.

I cannot help the other lady if she refuses to work with us and trap neuter and return but I think it would be a better solution then dropping \$1,500 to remove hers. Maybe the board can require her to tnr and feed them else where away from the building, yes?

When does the board meet in Thursday?

Good Morning,

If the owner who is feeding is not willing to take responsibility, then the Board will have to determine what actions they will take regarding this new colony.

Given their current position, **in my opinion**, it is likely they will be trapped and removed/euthanized since they do not want this problem to continue on the property. I can advise you of their decision following the Board meeting.

Sincerely,

There are 9 cats including kittens. The board has to keep in mind that even if she stops feeding that is not going to stop the problem. Those 9 cats and kittens don't disappear into thin air. They

are still around, having kittens under someone else's bush on the property. We would like to trap them and get them spayed so they are not reproducing, but she wasn't interested in that. We need to be allowed to control the population humanely, otherwise you will be constantly chasing down people for feeding.

Most people who see cats outside are inclined to put food out for them. It's human nature.

Hello,

Thank you for the update. No, I was not aware of this colony. I will see if I can identify the owner responsible, however, the Board will take strong action against the owner for feeding in the common areas. I appreciate the information. I have not yet had a determination from the Board on the use of the property for the colony for Ms. Whiteside as this matter will be considered at the Board meeting on Thursday. I will advise you of the Board's determination following the meeting.

Sincerely,

Hi Lisette,

I thought I would update you on our progress. We have trapped 4 so far. One was not returned to the property.

We have another feeder on the property whom is feeding at their patio. Deborah tried to talk to them to get them TNR and they seemed uninterested and didn't care if they reproduced. There are kittens at this separate colony.

Are you aware of these people?

Good Afternoon,

Thank you for the letter. I understand you have put traps out on our property for the cats. I thought since the colony is in Mt. Prospect, that the traps would go on their lands. I will forward your letter to the Board at the next meeting on June 27, 2013. If they need any additional information or requests, I will let you know. Also, there is currently a cat in the trap that was reported to the office.

Sincerely,

Lisette Ray, CMCA
